

THOUSANDS OF NEW JOBS & UNIVERSITY TOWN CENTER

University Town Center will create 11,000 jobs during construction and 8,000 fulltime jobs once complete.

As the Illinois unemployment rate climbs to its highest rate since 1983 and tops 12% in the metro-east, the time for University Town Center is now!

University Town Center: Entertainment and Tourist Destination and Economic Engine

Planned for the intersection of I-270 and Route 157 and Route 162 in Glen Carbon, IL, University Town Center will include a mix of destination and entertainment businesses and office and retail space. It will complement existing businesses and local communities by drawing millions of new visitors to the region. Once complete, UTC would generate approximately \$2 million in annual revenue for the Levee District.

For communities and local businesses to benefit from these dollars, the Illinois General Assembly must pass legislation authorizing STAR Bonds.
